> **LCB File No. R049-14. Network Adequacy.**
> A regulation relating to insurance; establishing certain requirements relating to the adequacy of a network plan issued by a carrier; authorizing the Commissioner of Insurance to determine whether a network plan is adequate under certain circumstances; requiring a carrier whose network plan is deemed or determined to be adequate to notify the Commissioner of any significant change to its network and take certain actions to correct any deficiency that results; providing for the availability of a network plan to persons outside of the approved service area in certain circumstances; creating a Network Adequacy Advisory Council; and providing other matters properly relating thereto.

(1) Why is the regulation necessary and what is its purpose? *The proposed regulation outlines the requirements for network plans to apply for and be approved by the Commissioner of Insurance ("Commissioner"). Existing federal[1,2] and state[3] law require health benefit plans utilizing a network plan to prove the adequacy of the number, type, and location of the providers and facilities included within the network.*

(2) What are the terms or substance of the proposed regulation? *The proposed regulation outlines a procedure for a carrier wishing to apply for a network plan to have the application deemed adequate. It also provides for the ability of the Commissioner to declare a network plan adequate in certain instances when the application fails to meet the safe harbor provisions. The proposed regulation also outlines the requirements for network plans to remain in compliance and the potential remedies and penalties for failing to remain compliant.*

(3) What is the anticipated impact of the regulation on the problem(s)? *The proposed regulation is anticipated to mitigate some of the issues consumers, providers, facilities and insurers may experience in ensuring adequate access to medical care. Due to disparities in geography and medical care availability, the regulation is not anticipated to solve all issues consumers experience while trying to access medical care.*

(4) Do other regulations address the same problem(s)? *NAC 695C.1255 establishes similar requirements for Health Maintenance Organizations.*

(5) Are alternate forms of regulation sufficient to address the problem(s)? *No.*

(6) What value does the regulation have to the public? *The proposed regulation should help ensure that members of the public who purchase health benefit plans utilizing network plans have adequate access to medical care or other remedies available.*

A REGULATION relating to insurance; establishing certain requirements relating to the adequacy of a network plan issued by a carrier; establishing provisions relating to the determination by the Commissioner of Insurance of whether a network plan is adequate; requiring a carrier to notify the Commissioner of any material change to its network and take certain actions to correct any deficiency that results; providing for the availability of a network plan to persons outside of the approved service area in certain circumstances; ***creating a Network Adequacy Advisory Council;*** and providing other matters properly relating thereto.

Legislative Counsel's Digest

Existing law authorizes the Commissioner of Insurance to adopt reasonable regulations for the administration of the Nevada Insurance Code and as required to ensure compliance with federal law relating to insurance. (NRS 679B.130) Existing law also requires: (1) a carrier who offers coverage in the group or individual market to demonstrate the capacity to deliver services adequately before making any network plan available for sale; and (2) the Commissioner to promulgate regulations concerning the organizational arrangements of the network plan and the procedure established for the network plan to develop, compile, evaluate and report certain statistics relating to its services. (NRS 687B.490)

This regulation establishes certain requirements for a carrier who applies to the Commissioner for the issuance of a network plan. **Section 17** of this regulation requires a carrier who applies for the issuance of a network plan to establish that the carrier has contracted with an adequate number and geographic distribution of providers of health care. **Section 18** of this regulation requires the Commissioner to make a preliminary and a final list of the minimum number of providers of health care and the maximum travel distance or time, by county, which is presumed to be reasonable for certain specialties and categories of health care. **Section 19** of this regulation requires a carrier to gather and present sufficient data to establish the adequacy of its network plan to the Commissioner in conjunction with its annual rate and form filing. **Section 20** of this regulation requires a carrier who applies for the issuance of a network plan to establish that the carrier has a sufficient number and geographic distribution of essential community providers. **Section 21** of this regulation requires a carrier who offers a network plan on the Silver State

Health Insurance Exchange to use its best efforts to ensure that American Indians and Alaskan Natives who are members of the network plan have access to health care services and facilities that are part of the Indian Health Service. **Section 22** of this regulation establishes criteria the Commissioner may use to determine whether a network plan is adequate. **Section 23** of this regulation requires a carrier to monitor the ability and clinical capacity of its providers of health care. **Section 24** of this regulation requires a carrier to update its provider directory at least once a month and to post each update on its Internet website. If a material change to a network plan occurs, **section 24** requires a carrier to update its directory within 3 business days and notify all covered persons affected by the material change. **Section 25** of this regulation requires a carrier to notify the Commissioner of any material change to its network plan within 3 business days. **Section 26** of this regulation requires a carrier to take certain actions to correct any deficiency in its network plan that results from such a material change. **Section 27** of this regulation allows the Commissioner to declare a network plan inadequate pursuant to existing law if it remains deficient at the end of the time period allowed for corrective action. **Section 28** of this regulation excludes a network plan issued by certain smaller carriers from the provisions **sections 20-22, 26 and 27** of this regulation and deems such a network plan to satisfy the requirements of existing law. **Section 29** of this regulation excludes certain other plans from the provisions of this regulation.

TEXT OF REPEALED SECTIONS

695C.160 Geographic area of service: Definition. (NRS 679B.130, 695C.130, 695C.275)

1. An organization shall clearly define the geographic area it intends to serve which:

(a) In a county having a population of 100,000 or more, must have a radius of not more than 25 miles between the subscriber or individual enrollee and a primary physician and the hospital used by the organization. This subsection does not apply to services rendered pursuant to Medicaid or Nevada Check Up.

(b) In any other county, must be defined by the organization under a plan for the provision of health care services if the organization receives the written approval of the Division for such a geographic area by:

(1) Demonstrating the availability and accessibility of services to its enrollees, including reasonable access to primary physicians, a hospital and to medically necessary services or services in an emergency; and

(2) Submitting a statement concerning the standards within that community regarding the availability and accessibility of other health care services and demonstrating that the organization will meet the community's standards for such services.

2. As used in this section, "Nevada Check Up" has the meaning ascribed to it in NAC 442.688.

695C.200 List of providers: Submission; changes; extension of submission date;

excessive reduction. (NRS 679B.130, 695C.070, 695C.275)

1. Each applicant for a certificate of authority shall:

(a) Submit a list of the providers in its health care plan and a description of the type of providers based upon a projected number of enrollees;

(b) Sufficiently describe its list of providers to demonstrate the accessibility and availability of health care to its enrollees; and

(c) Describe a plan for increasing the number of providers based upon increased enrollment.

2. The organization shall notify:

(a) For a health maintenance organization, the Division and the State Board of Health in writing not later than 14 days after the end of each quarter of each calendar year of any changes in its list of providers unless an extension is granted pursuant to this paragraph. On or before the date on which the notification is due, the health maintenance organization may submit a request to the Commissioner for an extension of time in which to provide the notification of not more than 30 days after the date on which the notification is due.

(b) For a provider-sponsored organization, the Division in writing not later than 14 days after the end of each quarter of each calendar year of any changes in its list of providers unless an extension is granted pursuant to this paragraph. On or before the date on which the notification is due, the provider-sponsored organization may submit a request to the Commissioner for an extension of time in which to provide the notification of not more than 30 days after the date on which the notification is due.

(c) An enrollee in writing of the disassociation of his or her primary physician from the organization not later than 30 working days after such disassociation.

3. Based upon the current list of providers of an organization, an overall reduction of more than 30 percent in the number of primary physicians in a geographic area of service or a material

change in the panel of specialists shall be deemed by the Division to jeopardize the ability of the organization to meet its obligations to its enrollees, and the Division will so notify the organization, and for a health maintenance organization, the Division will also notify the State Board of Health. The organization may rebut this presumption by providing written information to the Division within 14 days after the notice is sent to the organization.

4. The provisions of subsection 3 do not apply if the organization:

(a) Notifies the Division in writing;

(b) Submits information concerning the number of persons enrolled in the organization and the reasons for any reductions; and

(c) Obtains the approval of the Division in advance for the reduction.
